

AKSHATA SHEJWAL

Aspiring QA Engineer

✉ akshatashejwal2004@gmail.com ☎ 8928087325 📍 Mumbai, India 🔗 [akshata-shejwal](#) 📱 [akshata3113](#)

Professional Summary

Fresher QA candidate with hands-on full-stack development background (React, Vue.js, Node.js), giving a practical edge in understanding API behavior, and root-cause debugging during testing rather than surface-level bug spotting. Skilled in manual, functional, and regression testing with strong exposure to the full bug life cycle and SDLC/STLC. Currently pursuing MCA alongside an active development internship, and self learning automation to grow into a hybrid QA role.

Education

Master of Computer Applications (MCA)

Late Bhausaheb Hiray S.S Trust's Institute of Computer Application Bandra East

2025 – 2027

- Semester 1 SGPA: 8.7
- Semester 1 SGPA: 8.4

Bachelor of Science in Information Technology (B.Sc IT)

Nirmala Memorial Foundation College, Mumbai

CGPA: 8.68

2022 – 2025

Internship Experience

Frontend Developer

CloudRight

02/2026 – Present

- Built and validated Shopify storefront features end-to-end, manually verifying functionality across product, cart, and checkout flows before each release.
- Developed reusable React.js components and cross-checked them against design specs to catch UI inconsistencies before they reached QA/staging.
- Debugged cross-browser and cross-device issues, systematically isolating root causes rather than surface-patching — the same diagnostic approach used in defect triage.
- Worked within sprint cycles alongside design and backend teams, translating requirements into functional code and re-verifying fixes post-deployment.

Project Experience

CampusHire

Campus Recruitment Platform | QA Focus | Vue.js, Node.js, MongoDB

06/2024 – 01/2025

- Designed and executed 20+ manual test cases covering functional, regression, and smoke testing across student, company, and admin roles, achieving ~95% workflow coverage by mapping each user flow to a structured test scenario before execution.
- Reduced usability-related defects by ~30% by systematically logging bugs with clear repro steps, severity, and expected-vs-actual behavior, following the full bug life cycle from identification to closure.
- Validated 12+ REST API endpoints for CRUD operations and response accuracy by designing and running Postman test collections, checking status codes, payloads, and error handling.
- Improved release readiness by collaborating with the dev team during sprint cycles to clarify requirements and re-verify fixes.

Blog Application

Blogging Platform | QA Focus | React.js, Node.js, MongoDB

07/2023 – 09/2023

- Authored functional test scenarios for authentication, content publishing, and commenting flows, catching state management and session-handling edge cases before they reached production.
- Increased form-validation reliability by testing field-level input handling (empty states, invalid formats, boundary values) across all CRUD operations.

Portfolio Website

QA + Frontend

03/2023 – 04/2023

Ensured cross-browser and responsive UI consistency by testing across 4+ breakpoints and 3 major browsers, catching layout defects invisible on a single-device check.

Core Skills

Testing Methodologies

- Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Exploratory Testing
- Test Scenarios, Test Case Design, Test Execution, Defect Reporting, Bug Life Cycle

Development Technologies

- JavaScript, HTML, CSS, Bootstrap, Vue.js, React.js
- Node.js, Express.js, MongoDB, MySQL

Process & Tools

- SDLC, STLC, Agile/Scrum exposure
- Postman (API Testing – Basic), Chrome DevTools, Git, GitHub

Soft Skills

Documentation, Communication, Collaboration, Analytical Thinking

Certifications

MERN Stack Development

Issuer: SDAC Infotech
